MOHNISH KUMAR

Python Developer & AI Specialist | Generative AI & Agentic Workflows
Email: mohnishkumar724@gmail.com | GitHub: github.com/Mohnish448

PROFESSIONAL SUMMARY

Python Developer and AI Enthusiast specializing in Generative AI, LLM applications, agentic workflows, and backend API engineering. Proven experience in turning unstructured operational data into reliable, automated processing pipelines with human-in-the-loop review.

PROFESSIONAL EXPERIENCE

First Quadrant Labs - LLM Application Developer (Internship, Pursuing)

- Developed AI-powered workflows to transform unstructured operational notes into structured, actionable data.
- Built Python-based applications and APIs for information extraction, data validation, and automated processing.
- Stack: Python, FastAPI, REST APIs, Pandas, JSON, CSV, Streamlit, Ollama, LLMs, Pytest, Git, Swagger.

Surekha Enterprise - Computer Hardware Installer & Tester (Internship, 6 Months)

- Executed hardware diagnostics, assembly, component testing, and preventive system maintenance.
- Configured operating systems, device drivers, and BIOS/UEFI settings for reliable workstation performance.
- Tools: Hardware Diagnostics, PC Assembly, Windows OS, Drivers, BIOS/UEFI, Hardware Troubleshooting.

CORE TECHNICAL SKILLS

* GenAI & LLMs: LangChain, Ollama, Prompt Engineering, LLM Integration, Agentic Workflows
* Backend & Data: Python, FastAPI, REST APIs, Pandas, SQL, JSON, CSV, Pytest, R
* Frontend & 3D: React, Next.js, JavaScript, Tailwind CSS, Three.js, HTML5/CSS3
* Tools: Git, GitHub, Streamlit, Firebase, Figma, BIOS/UEFI, Hardware Diagnostics

FEATURED PROJECTS

1. DocPilot AI - AI-Powered Document Intelligence & Processing (Deployed)

- Deployed at docpilot-ai-production.up.railway.app | Stack: Python, LLMs, API infrastructure.
- Simplifies document handling with automated parsing and intelligent information extraction.

2. NextStep AI - Career Roadmaps & Structured Learning Guidance

- Stack: Next.js, Firebase, LangChain, FastAPI, Groq | Generates personalized learning paths.

3. CRM Notes Follow-Up - Automated Task Extraction (Completed)

- Stack: Python, Streamlit, Ollama, Pandas | Converts unstructured CRM notes to prioritized tasks.
