PROFESSIONAL SUMMARY

BBA in Information Technology graduate and aspiring full-stack and LLM application developer with hands-on project experience building AI-powered workflows, Python APIs, document-processing and retrieval systems, and responsive web interfaces. Currently pursuing a Master Diploma in AI/ML and Data Science, with interests in Generative AI, agentic workflows, and practical AI automation.

EDUCATION

Boston Institute of Analytics, Mumbai **Pursuing**
Master Diploma in AI/ML & Data Science

- **Relevant learning:** Python, Pandas, machine learning fundamentals, Generative AI, LLM integration, prompt engineering, LangChain, AI workflows, and agentic AI concepts.

Integral University, Lucknow **06/2022 – 07/2025**
BBA in Information Technology *CGPA: 7.74/10*

- **Coursework:** Management, Database Management Systems (DBMS), R Programming, Statistics, Taxation, and Supply Chain Management (SCM).

EXPERIENCE

First Quadrant Labs **Ongoing**
LLM Application Developer Intern

- Contribute to LLM-powered application and workflow development, focusing on structured information extraction, task-oriented automation, and practical AI application workflows.
- Built workflow prototypes that transform unstructured operational notes into structured, review-ready outputs while documenting scope, limitations, and validation.

Surekha Enterprises, Lucknow **6 months**
Computer Hardware Installer & Tester

- Assisted with computer hardware installation, component setup, system configuration, and functional testing to help ensure reliable system operation.
- Supported troubleshooting and basic hardware checks, identifying setup issues and verifying equipment readiness after installation.

PROJECTS

DocPilot-AI |
Tech stack: Python, FastAPI, PDFPlumber, Sentence Transformers, ChromaDB, llama.cpp

- Developed a document question-answering workflow covering PDF text extraction, chunking, embeddings, vector storage, and retrieval-augmented responses.
- Integrated lightweight local LLM components to improve deployment efficiency while preserving the document-processing and retrieval workflow.

NextStep-AI |
Tech stack: Next.js, React, Firebase, FastAPI, LangChain, Groq

- Built an AI career-roadmap experience using user-provided education, skills, goals, and timeline to generate structured career guidance.
- Designed the output around **6 phases with 4 tasks per phase (24 tasks total)** and **2–3 skill/job resource suggestions** in structured JSON.

Claims Intake Structuring |
Tech stack: Python, FastAPI, Pydantic, JSON, CSV, Pytest

- Built a FastAPI workflow that structures unstructured claims-intake notes into consistent fields for operational review, with Swagger documentation and JSON/CSV batch exports.
- Processed **85/85 synthetic records (100% batch coverage)** and validated the workflow with **61 automated tests**; unidentified fields remain blank rather than containing invented details.

Starbucks-In | | **Live Demo**
Tech stack: Next.js, React, JavaScript, CSS

- Created an independent, unofficial Starbucks-inspired frontend concept showcasing UI/UX design, visual styling, and

frontend development skills.

- Built a responsive interface for mobile, tablet, laptop, and desktop screens. This is a portfolio concept, not an official Starbucks website.

Technical Skills

Programming & Computer Science: Python, JavaScript, Data Structures and Algorithms (DSA)

Generative AI & Agentic AI: LLM integration, LangChain, prompt engineering, AI workflows, local LLMs (Ollama), AI task automation

Python & Backend: FastAPI, REST APIs, Pandas, data processing, SQL, database management, R Programming

Frontend & 3D: HTML5, CSS3, JavaScript (ES6+), React, Next.js, Tailwind CSS, Three.js, responsive web design

UI/UX & Tools: UI/UX design, Figma, Git, GitHub, Firebase, API integration

Certifications

IT Smart Plus Certification | Graphic Designer Certification
