

MOHNISH KUMAR

Python Developer & AI Specialist | Generative AI & Agentic AI

Email: mohnishkumar724@gmail.com | GitHub: github.com/Mohnish448

PROFESSIONAL SUMMARY

Passionate Python Developer and AI Enthusiast specializing in Generative AI, Agentic workflows, and full-stack interactive applications. Experienced in developing intelligent document intelligence, automated CRM task extractors, and scalable modern web solutions.

CORE TECHNICAL SKILLS

- * Generative AI & Agents: LangChain, Ollama (Local LLMs), Prompt Engineering, AI Workflows
- * Backend & Data: Python, FastAPI, REST APIs, Pandas, SQL & Database Management, R
- * Frontend & 3D: React, Next.js, JavaScript (ES6+), Tailwind CSS, Three.js, HTML5/CSS3
- * Tools & Cloud: Git, GitHub, Firebase, Figma, UI/UX Prototyping, Docker

FEATURED PROJECTS

1. DocPilot AI - AI-Powered Document Intelligence & Processing

- Live Production Application (docpilot-ai-production.up.railway.app)
- Simplifies document handling and intelligent extraction using LLM pipelines.
- Built with Python, LLMs, and modern API infrastructure.

2. NextStep AI - Career Roadmap & Structured Skill Planning

- Transforms user aspirations into modular, phased learning journeys.
- Stack: Next.js, Firebase, LangChain, FastAPI, Groq.

3. CRM Notes Follow-Up - Automated Task & Action-Item Extraction

- Converts unstructured meeting notes into prioritized CRM tasks with deadline detection.
- Implemented human-in-the-loop review for uncertain flags.
- Stack: Python, Streamlit, Ollama, Pandas.
